Tissières, A. and Watson, James D. 1962. Breakdown of messenger RNA during in-vitro amino acid incorporation into proteins. *Proceedings of the National Academy of Sciences* **48**: 1061-1069.

Watson, James D. 1963. Involvement of RNA in the synthesis of proteins. In *Les Prix Nobel en 1962*, pp. 155-178. *Nobel Foundation*, Stockholm, Sweden.

Watson, James D. 1963. Involvement of RNA in the synthesis of proteins (adapted from Nobel Lecture, December 1962). *Science* **140(3562)**: 17-26.

Watson, James D. 1964. The synthesis of proteins upon ribosomes. *Bull. Soc. Chim. Biol.* **46**: 1399-1425.

Watson, James D., Gussin, G.N., Capecchi, M.R., Adams, J.M., Argetsinger, J.E., Tooze, J., and Weber, K. 1966. Protein synthesis directed by RNA phage messengers. *Cold Spring Harbor Symposia on Quantitative Biology* **31**: 257-271.

Watson, James D. 1972. Origin of concatemeric T7 DNA. *Nature New Biology* **239**: 197-201.

Watson, James D. 1978. Trying to bury Asilomar. *Clinical Research* **26**: 113-115.

Watson, James D. 1978. The case for expanding research into DNA. *New Zealand Veterinary Journal* **26**: 182.

Watson, James D. and Cook-Deegan, R.M. 1991. Origins of the Human Genome Project. *FASEB Journal* **5**: 8-11.

Books

Watson, James D. 1965. *Molecular biology of the gene*. W.A. Benjamin, New York.

Cairns, J. Stent, G.S., Watson, J. D., eds. 1966. *Phage and the origins of molecular biology*. Cold Spring Harbor Laboratory of Quantitative Biology, Cold Spring Harbor, New York.

Watson, James D. 1968. *The double helix: a personal account of the discovery of the structure of DNA*. Atheneum, New York.

Watson, James D. and Tooze, J. 1981. *The DNA Story: a documentary history of gene cloning*. W.H. Freeman, San Francisco, California.

Watson, James D., Tooze, J., and Kurtz, D.T. c1983. *Recombinant DNA: a short course*. Scientific American Books, New York.

Alberts, B., Lewis, J., Roberts, K., Watson, James D., Bray, D., and Raff, M. c1983. *Molecular biology of the cell*. Garland Publishing Inc., New York.

Watson, James D., Gilman, M., Witkowski, J.A., and Zoller, M. 1992. *Recombinant DNA*, 2nd edition. Scientific American Books, New York.

Watson, James D. 2000. *A passion for DNA; Genes, genomes and society*. Cold Spring Harbor Laboratory Press, Cold Spring Harbor, New York.

Watson, James D. 2002. *Genes, girls and Gamow: after the double helix*. Alfred A. Knopf, New York (also published by Oxford University Press [2001] in United Kingdom).

Watson, James D. with Berry, Andrew. 2003. *DNA: The secret of life*. Alfred A. Knopf, New York.

Watson, James D., Ed. 2005. Commentaries in *Darwin, The Indelible Stamp: The Evolution of an Idea*. Running Press, Philadelphia, Pennsylvania.

Watson, J. D., Caudy, A. A., Myers, R. M., and Witkowski, J. *Recombinant DNA: Genes and Genomes -- a short course*. 2006. W. H. Freeman and Co., New York.

Essays, Forewords, Afterwords, and Lectures

Watson, James D. 1964. The replication of living molecules. In *Light and life in the universe* (ed. S.T. Butler and H. Messel), pp. 295-340. Shakespeare Head Press, Sydney, Australia.

Watson, James D. 1966. Growing up in the phage group. In *Phage and the origins of molecular biology* (ed. J. Cairns, G.S. Stent, and James D. Watson), pp. 239-245. Cold Spring Harbor Laboratory of Quantitative Biology, Cold Spring Harbor, New York.

Watson, James D. 1966 (Nov 24). Life's molecules take shape. *New Scientist* **32**: 424, 425, 428.

Watson, James D. 1968 (January). The double helix: the discovery of the structure of DNA. *The Atlantic Monthly* **221(1)**: 77-99.

Watson, James D. 1968 (February). The double helix, Part II: the discovery of the structure of DNA. *The Atlantic Monthly* **221(2)**: 91-117.

Watson, James D. 1971 (May). Moving toward the clonal man: Is this what we want? *The Atlantic Monthly* **227**: 50-53.

Watson, James D. 1971 (October). The future of asexual reproduction. *Intellectual Digest*, pp. 69-74.
